

17th november

08h45 - **Opening ceremony**

TABLE 1 - Simplicity, the ultimate sophistication

09h00 Is simple good?

09h30 Big problems in anaesthesia, the simple and best solutions

10h00 Discussion

10h15 **Symposium**

10h45 COFFEE BREAK

TABLE 2 KISSing the emergent patient

11h15 Monitoring in emergencies, do it usefully!

11h35 Regional anaesthesia in trauma patients. Where to block?

11h55 Airway management in facial trauma. Is KISS our best friend?

12h15 Discussion

12h30 **Symposium**

13h00 LUNCH

TABLE 3 KISSing some special populations

14h00 Paediatric locoregional anaesthesia made simple

14h20 KISS during delivery

14h40 Anaesthesia for frail patients: does simplicity help?

15h00 Discussion

15h15 **Symposium**

15h45 COFFEE BREAK

TABLE 4 Not always simple but always safe

16h15 Fluidotherapy: where do we stand? The less the safest?

16h35 Urban anaesthesia myths

16h55 The epidemic of fatigue among anaesthesiologists

17h15 Discussion

17h30 **Symposium**

18th november

08h30 Oral communications

TABLE 5 KISS across anaesthetic practice

09h30 Monitoring the intraoperative EEG: How to keep it simple?

09h50 Paediatric challenges outside the operating room

10h10 Anaesthetic drug-induced organ protection: simple strategies

10h30 Discussion

10h45 COFFE BREAK

TABLE 6 Not that simple afterall

11h15 TCI in general anaesthesia: friend or foe?

11h45 Locoregional complications made simple

12h15 Discussion

12h30 **Symposium**

13h00 LUNCH

TABLE 7 Anaesthesiology challenges of the XXI century – is simplicity the safest?

14h00 The role of anaesthesiology in the next decades

14h20 Intersection areas of Anaesthesiology: Risks and opportunities for the future

14h40 Task-shifting in Anaesthesiology - reality or not?

15h00 Discussion
